

SDI Review Form 1.6

PART 1:

Journal Name:	<u>British Journal of Applied Science & Technology</u>
Manuscript Number:	MS: 2013_BJAST_3094
Title of the Manuscript:	Lie algebra structures associated with zero curvature equations

General guideline for Peer Review process is available in this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

- This form has total 9 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	1 Introduction Page 2: In (1.2) the author(s) define $\mathbf{B}^r$ for $r \geq 1$ and used $K \in \mathbf{B}^q$ in (1.3) and also in subsection 2.1 and 2.2, without defining it.	We defined $\mathbf{B}^r$ for $r \geq 1$, and so $\mathbf{B}^q$ is just one of such spaces, where q is the dimension of the vector of dependent variables u as indicated on page 1.
<u>Optional/General</u> comments	The results obtained in this work are scientifically important and the manuscript is very well done. I only have the following suggestion: • The title could be “Lie algebra structures associated with <u>generalized</u> zero curvature equations”, since zero curvature equations is a particular case of it.	We changed it following the suggestion. Thanks!
