

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	2013_BJAST_4666
Title of the Manuscript:	Seasonal variation in heavy metal content of tongue sole, <i>Cynoglossus brownii</i> and croaker, <i>Pseudotolithus typus</i> from Lagos and Delta states, Nigeria

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Still required revision of the manuscript. However should be accepted after minor revision. Some minor changes/corrections are made in the file "2 Revised_paper_4666", Please follow the comments/suggestions. Authors' Contributions is not provided. In the text, citations should be indicated by the reference number in brackets [1]. See: "General Guideline for Authors" http://www.sciencedomain.org/page.php?id=general-guideline-for-authors Provide the Aim of Study at the end of Introduction section Describe the results and discussion parts separate. Discussion is not logically derived from the data presented. Discussion needs to be made threadbare. Although it is very important, but seasonal variation (Table 3, 4 and 5) is not discussed. According to the Journal's format, references must be numbered in the order that they appear in the text. Take help from: "General Guideline for Authors" http://www.sciencedomain.org/page.php?id=general-guideline-for-authors Delete the References, if not cited in the text: Skejelkvale, BL., Andersen, T., Fjeld, E. Mannio, J., Wilander, A., Johanson et. al. Environmental Pollution, 1999; 100(1-3), 179-196 United States Environmental Protection Agency, USEPA. Risk assessment guidance for Superfund volume I: human health evaluation manual (Part A), 1989; EPA/540/1-89/002, Washington, D. C	Authors' Contributions have been provided (Lines 271 – 277) Citations in the text have been numbered and the Reference List (Lines 278 – 383) reviewed accordingly The aim of the present study has been added (Lines 92 – 96) The results and discussion section has been reviewed. Results were presented then discussed logically as suggested (Lines 133 – 255). Seasonal variation in metal content was described in Table 3 and discussed thereafter (Lines 182 – 195) References have been re-numbered and presented as they appear in the text (Lines 278 – 383) This reference was cited [18] (Lines 74 & 78) and numbered 18 on the Reference List (Lines 322 – 324) USEPA was not cited in the text and has been duly deleted
