

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	2013_BJAST_4834
Title of the Manuscript:	COMPARATIVE ANALYSIS AND PERFORMANCE OF SOLAR DRYERS WITH BACKUP INCINERATORS FOR NSUKKA SUB-TROPICAL AND MAKURDI HUMID LOCATIONS USING SELECTED FARM PRODUCE

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. The authors should give more details about other solar dryers in their introduction, as a literature review. 2. The authors should give more details about the Materials and Methodology (e.g. Mathematical model, Experimental set-up, and Instrumentation).	1. Some details about solar dryers have been added to the introduction. See yellow highlights. 2. I don't know what other detailed information is needed in the Materials and Methodology, the ones there is sufficient. The experimental setup and instrumentation there are succinct in themselves. The scope of the work did not involve mathematical models or models nor the objectives. Such will be captured in subsequent studies.
