

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	2013_BJAST_6102
Title of the Manuscript:	KNOWLEDGE OF SEXUALLY TRANSMITTED INFECTIONS (STIs) INCLUDING HIV/AIDS AMONG UNIVERSITY STUDENTS

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The manuscript has been revised and has improved markedly from the original manuscript although it was difficult to read as the fonts were colored in light yellow in some places and black in others. Although the authors claimed that corrections have been made, there are still glaring errors in the revised manuscript. Names of sexually transmitted diseases need not be capitalized. The authors have chosen not to include a separate title of 'Discussion' to further elaborate on the results. If this format is acceptable to the BJAST, then I have no issues with it although it is highly unusual for most journals to have an exception in this regard. Personally I feel the manuscript needs further revision before it can be considered for publication.	Thanks and sorry for that A separate title for 'discussion' was not included because BJAST required it As 'RESULTS AND DISCUSSION' Further revision has been made and corrections has been effected
