

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	2013_BJAST_6663
Title of the Manuscript:	Assessment of Digital Village Projects in Developing Countries - Case of Kenya

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The comments on the previous draft have been addressed. However 2 issues have been identified in the present draft. 1. The Livelihood Framework does not fit the frameworks of assessing ICT projects. There is no demonstration of how the key elements fit in the analysis. It should be deleted from Table 1. 2. The presentation of Tables 6 and 10 can be simplified if the means of responses for item of assessment are reported instead of the frequencies of responses. Also, Table 3 and figure 6 contain the same information therefore 1 could be deleted, preferably the figure which presents the frequencies only.	The Livelihood Framework has been deleted from table 1 Tables 6 and 10 have been simplified We believe the review meant to refer to Table 9 and Figure 5 and not Table 3 and Figure 6. Figure 5 has been deleted
