

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	2013_BJAST_6993
Title of the Manuscript:	EXTRACTION AND ANALYSIS OF CHEMO-PHYSICAL PROPERTIES OF YELLOW OLEANDER OIL AS LUBRICANT

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
It looks much better now. Degree Celsius is still an issue for the authors. I have addressed it the way it should be as well as some typing mistakes. But, I am not very happy with the references. I think the authors can do it better than now. After the authors' amendment, if the Editor is happy with the references, there is no need to send back to me again.	The Degree Celsius issue raised by the final Evaluator have been corrected throughout the paper using Microsoft SYMBOLS tool. The references have been aligned in content and context as indicated in lines 280-315, 344-350 and 357-359. The references were further updated and carefully aligned with the in-text references. Some references obtained from local journals were expunged to enhance the papers broad outlook.
