SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Introduction is too long, it should be shortened. The language is found as poor, It should be revised for native speaker. References in text ll be given as numeric. It should be given more details and references about depression and menopause. The study objectives should be written clearly. Drug doses should be given. Why did you give to mean height and weight??? I think, It needs not to table 1and 2 , it should be removed, enough to just written in text. Discussion is very bad written, it should be rewritten. Please read: Ağıl A, Abıke F, Daşkapan A, Alaca R, Tüzün H. Short-term exercise approaches on menopausal symptoms, psychological health, and quality of life in postmenopausal women. Obstet Gynecol Int. 2010;2010. doi:pii: 274261. It s very important issue but manuscript is poor written. After the revision, I want to rereviewed thid paper.	Introduction was shortened. The language was revised. References in text ll was given as numeric. more details and references about depression and menopause were given(line 27-34) The study objectives was written clearly. line61,62,63. Drug doses was 20mg/day(line 70) height and weight were removed(line 98,99,100) table 1and 2 was removed, just written in text. Discussion was rewritte. Thanks
