

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	MS: 2012/BJAST/2826
Title of the Manuscript:	Cherenkov Effect in ionospheric E layer plasma for Oxygen-ion.

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The paper fails to address the significant issues. In my previous report a few were mentioned, but nothing has been done with these remarks, even the typo in equation 2.9 was not removed nor were more appropriate references added.	1- I Wish to inform you that i changed some parts as you mentioned that all are evidenced in the text 2- As i mentioned befor 3- My most important goal in this paper was searching Cherenkov Effect in the ionosphere E layer plasma , it is plausible or not ,you see that all my calculations cited this . 4- As you see all cited references are that somehow they used in the text ,although i,m sure that this important phenomenon is mentioned in the other important reference as you mentioned but i didn,t used any matter from them so i mentioned only the references that i used in my text i wish to ask you please kindly pay attention to the changments happened in my text of this paper . 5- Truly yours Dr Zahra Emami prof of Plasma physics school of science Islamic Azad University Mashhad Branch
