Subject: Re: Request for final decision for manuscript number 2013/BJAST/6375

I accept publication of the below mentioned paper in its present form, however the following editorial amendments are necessary:

1. Line 98. It seems to me that "mer" is redundant.
2. Line 100. "e.g." instead of "eg".
3. Fig. 8 is not present in the paper, however it is recalled in the text. Probably Figure 9 should become Figure 8, Figure 10 should be converted into Figure 9 and so on.
4. Line 350. "2.27-2.74 min" instead of "2.27-2.74min".
5. Lines 355 and 361. Fonts used in "[44]" and "[45]" are superscripts.
6. Line 391. "Fig 10d" instead of "Fig 10 d".
7. Line 393, 401, 410, ... "Appendix" instead of "appendix". Please double check the entire paper for the mistake of this type.
8. Line 514. We have two "also"s in this line. I suppose one of them is redundant.
9. Line 531. "ethyltoluene" instead of "ethyltouene".
10. Line 627. "... that under high temperature in GC injector are decomposed to the indicated compounds..." instead of "... that under high temperature in GC injector decomposed to the indicated compounds...".
11. Line 667. The sentence starting in this line is unclear to the editor. Please change it.
