

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	2013_BJAST_4486
Title of the Manuscript:	EFFECT OF GRADED LEVELS OF YEAST FED IN WATER ON THE PERFORMANCE OF BROILER CHICKENS

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. The authors should calculate the total amount of yeast eaten per day in each experimental group, since they had recorded the consumption of feed and water (page 3 , line 93) 2. Label the unit for each item in table 2 3. The author should address which stage of yeast was supplemented in the ABSTRACT section 4. The initial weight of broilers at the finisher stage were significant different among the treatment, especially the control group which is the smallest one, why the authors had the confidence to say that "Best results were in yeast inclusion levels of 0.5g and 1.0g.". It might be due to the bias at the beginning 5. Most of importance, all the researchers do the animal experiment should know the institute of animal care and use committee (IACUC), and the experimental design should be approved by IACUC, the goal of IACUC is to promote the humane care of animals used in biomedical and behavioral research, teaching, and testing; the basic objective is to provide information that will enhance animal well-being, the quality of biomedical research, and the advancement of biologic knowledge that is relevant to humans or animals. 6. Poor grammar
