<p>I think it is too strong statement to write that the knowledge of HIV was high with so many misconceptions, may be "relatively high".</p> <p>I miss comparison between women and men in Table 2 and Fig. 1,2,3. If difference is found show in figure, if no difference this can be written in text.</p> <p>In Fig 2,3 number of participants should be added in figure or legend and decimal should be marked with . and not ,</p>
