SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. Add the gross energy values of different feeds and the crude protein content of different feed ingredients. 2. Description about the superscripts should be given below the tables which has the alphabetical superscripts. 3. In the proximate composition of silk worm pupae, it is better to give the mean$\pm$SD values. 4. What about the data on physico chemical parameters of water during the experiment? why alkalinity and hardness were not measured as these significantly affects the growth and survival of fish? 5. Line no 133. It is FCR 6. Line No 160? What is the meaning of highest and least? 7. The lower the feed conversion ratio, better is the feed. Please re write the discussion accordingly. 8. Line no 299. The statement is not clear.	This is not particular This has been effected Not necessary The parameters were within optimum range. Corrected Reviewed as appropriate Corrected Statement modified
