

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	2014_BJAST_11075
Title of the Manuscript:	Comparative Effects of Low- and High-Glycemic Index Diets on Biochemical Variables and Organ Histology in Alloxanized Diabetic Rats
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

**PART 1: Review Comment**

	Reviewer's comment	Author's comment (if agreed with reviewer, corrects the manuscript and highlights that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. They have to follow Journal guide, some references are missing as : WHO, 1985; Freidwald <i>et al.</i>, 1972; etc....., and they present in the text as it is not in figures and not present in the Ref, they need to review all article. 2. The statement in line 79, 81 need Reference, 3. The statement in line 102, 103 need Reference, 4. The statement in line 87, 88 need References, Also lines 253-256 need to be in connection with statement in line 87, 88. 5. What is the need for kits if they are using <u>dry-chemical auto analyzer</u>. 6. <u>Organ weights</u>: Table 2, fig 1 represents mean organs weight not relative organ weights, In line 140-141: No significant change observed in the relative weights of organs (liver, heart, kidney, lung, spleen and testes), With no data emphasis this. Also in the table there is a significant change in lung of HGI, LGI when compared with the control ??? 7. in table 2 : there is no significant difference between (DRG: 312.33 ± 5.85^b vs DFG: 273.17 ± 1.72^{ab}) need revision?? 8. In table 3: If you applied Freidwalid equation e.g. for DFG [LDL-C = $60.50 - (8.35 + (52.24/5)) = 41.702$] while in table LDL-c = 54.32 ??? 9.	Corrections appreciated and received with good temperament. All are geared towards producing qualitative and standard publication. Necessary references referred to have been included as stipulated in the lines mentioned and are highlighted yellow in the reference section. Kits deleted (thank you). No statements are in lines 102 and 103 (check – just space and subtitle). Relative deleted (thanks). Item 6 considered and amended. Thank you. The value inserted for lungs was a typographical error (HGI: 1.17 not 1.47; LGI: 1.13 not 1.3). The values of the body weights were compared with the control (superscript “a” deleted). Table 3 - LDL calculated accordingly (friedewald) and corrected. Thanks.
Minor REVISION comments		
Optional/General comments	Very important: The Statistical analysis needs to be rechecked again	Well rechecked and correction made accordingly. Great thanks.
