

SDI Review Form 1.6

PART 1:

Journal Name:	<u>British Journal of Applied Science & Technology</u>
Manuscript Number:	2013_BJAST_4402
Title of the Manuscript:	Farm Households Coping Strategies to Climate Change (A Review)
Type of the Article	Review

General guideline for Peer Review process is available in this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

- This form has total 7 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	Comments 1- This work is a compilation of previous studies 2- Better to put the results of previous studies at the tables, stating: Region – the proposed adaptation strategy — rate of change – the reference for these results. 3- You must mention the impact of climate change on regions before talking about the	I have tried to reflect this in the work I do not think that the impact is mandatory. I think that depends on the scope of the paper and I do not intend to cover that aspect. How ever, if the editors think that I should still cover impact

SDI Review Form 1.6

	results of adaptation studies (The change percent in any area under future climate change conditions). 4- After explaining the results of adaptation studies, I hope to write a paragraph about the economic cost of each proposed strategy (cost of application of each strategy and the economic return) so that gives an opportunity for farms or decision maker or investor to choose the appropriate adaptation strategies.	before presenting the coping strategies then they can tell me so that I will present them (note that most of the papers I reviewed did not cover impact of climate change on the regions they covered). The strategies presented are not proposed strategies but actual strategies used so it may be difficult for me to know the economic cost of the each strategy.
<u>Optional/General</u> comments		I wish to say that I am very grateful indeed for all comments made because they have opened my eyes to issues which I thought were not important before. Thank you.
