

SDI Review Form 1.6

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	2013_BJAST_6034
Title of the Manuscript:	Wavelet LPC with Neural Network for Spoken Arabic Digits Recognition System
Type of the Article	Research Paper

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	4 types of Feature extraction methods are specified in the proposed work. The obtained results of feature extraction can be shown in the results section. In table 4, The recognition rates can be specified as like Table 3 in a clear way.	The results are shown in the results section. According to table 4, it contains the results of noisy environment for certain digits.
<u>Minor</u> REVISION comments	The proposed work recognition rates can be compared with other related works specified in the literature survey and if possible can be tabulated in a separate table The reference of the Table number inside the description should be in uniform [Reference Table 3 and in some places as Tab.3]	Yes that is correct. For this reason we have done a comparison with the known method by Alotaibi.
<u>Optional/General</u> comments	Good work. Abstract, Introduction and methodology, proposed system descriptions are good Tables should have appropriate and clear headers The way of writing the highlights of your proposed system can be changes	I have done some correction to the text.
