PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The manuscript demonstrated an interesting work. The results obtained in this work is clearly explained and I have found minor corrections, they are as follows, The organism name must be mentioned in italic, Result and discussion Author has to mention the fig.7 in the section 3.2. References are not in same order or poor arrangement. Because, the title of the references missing in some references for ex. Ref No 8, 15, 16, Overall, authors should correct the reference part, Language is good. The results are neatly presented. Improve the alignment.	The corrections suggested including the references have already been taken care of and were in yellow on the first corrected manuscript. These are now in black like the rest of the body of the manuscript. We appreciate the contribution from the evaluator.
