

Editorial Comment:

Specific comments:

Overall, this manuscript needs to be checked carefully for grammatical and typographical errors.

Line 9: change “human tumor cells” to “human tumor cell lines”. This change needs to be done throughout the manuscript.

Line 17: correct the spelling for “fibroblasts”

Line 22: Remove “These showed that”. Start this sentence with “SSS, MSS, LSP and ...” or re-frame the sentence.

Line 80 and 88: correct ‘Phillipsburg’

Line 81: correct ‘approx’

Line 101: correct ‘over-expression’

Line 113: mention the suppliers of the chemicals and antibiotics.

Line 144: correct ‘Aldrich’

Line 188: correct ‘ $P < 0.05$ ’ (as in line 184). This needs to be consistent throughout the manuscript.

Line 275: Briefly explain why and how these 3 bacterial strains/species were selected for this study.

Line 307: correct “because it is known...”

Line 309: correct “significant differences”

Line 319: correct “Tumor cell lines PC3 and HeLa were more sensitive...”]

Author Feedback:

All changes were applied like suggested by you

The whole manuscript was again read and it was checked carefully for grammatical and typographical errors.

Revised manuscripts with change control and without change control were sent.

The information suggested by you in the point of the line 275 was added in the manuscript; however, we consider than that information should be added in the section of M&M in lines 159-164 of the revised manuscript without change control.
