

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	2013_BJAST_4402
Title of the Manuscript:	Farm Households Coping Strategies to Climate Change (A Review)

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
- I must commend the authors for taking time to review the manuscript in great detail, particularly empirical data which is now presented. However, while I understand the manuscript is a review, I feel some, if not most of the tables and figures presented are copied exactly as is from their original manuscripts (<u>and I believe some of them journals which they were extracted have copyright issues), and I am not sure about the BJAST's stance on that.</u> I suggest the same data be presented in a different manor and properly referenced e.g. Fig 4 can be presented as a pie chart for the same data. For the Zimbabwean case (fig 2), a table, bar charts or even a closed pie chart would suffice. - Table 3 (page 12) is referred to in the text as Table 2. Please edit accordingly. - Some of the references are still not aligned and this needs to be paid attention to. E.g. under fig 2 it say (9) when it is actually (10), according to the ref list.	Figures 2 and 3 have been changed to Tables but figure 4 was created by me. Correction effected. Correction effected. Thank you.
