

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	2013_BJAST_8500
Title of the Manuscript:	Effect of Extrusion Cooking Variables on the Torque and Specific Mechanical Energy of a Single Screw Extruder.

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Below is my comments: 1) There is still some grammatical errors in line of 190,191, 203. The authors as I said previously have to check the manuscript. 2) The explanations for Table 4 & 5, as well as Fig. 3 & 4 are too short again. 3) The organization of paper is still weak. For example, the authors just add the same sentences to paper. Look lines of 203 and 184. These line give the same concepts exactly. The authors have to re-write just the results and discussion section. SO I BELLIVE THE PAPER NEED SIGNIFICANT REVISING. I THINK THE AUTHORS MUST SPEND MORE TIME ON THIS PAPER. please feel free to send the revise format of paper for me, or new papers, and accept my apologizes for late response. I am so busy in work, but have time for reading your papers, if you think I am helpful.	The Authors have checked the manuscript . Line 203 and 184 did not give the same concept. Line 203 explained the model while line 184 indicated the result of the torque at critical values of the independent variables. The Authors consider the discussion as adequate. However, the Reviewer can expand the results and discussion as the Reviewer deem fit.
