

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	2013_BJAST_8555
Title of the Manuscript:	COMPARATIVE ANALYSIS OF THE NUTRITIONAL QUALITIES OF SEEDS OF SHEANUT (<i>Vitellaria paradoxa</i>) AND COCOA (<i>Theobroma cacao</i>)
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The following are my final comments: 1- There is a quality improvement of the manuscript 2- The formatting needs to be revised by the editorial office (this is a technical issue can be handled by your staff) 3- Figures 1, 2, and 3 have no Y-axis label. I suggest the authors would write something like the following: for Y-axis for figure 1 "chemical composition (%)"; for figure 2 "Mineral concentration (mg/kg)"; for figure 3 "Anti-nutrient content (unit)". 4- The conclusion must include something like this "this research was conducted for one year only, and further research is needed to see the effects of environments in each year on these chemical composition components" 5- I think the paper can be acceptable, but the editorial office needs to revise the manuscript carefully.	The Y-axis of the entire graphs has been properly labeled. The suggested statement by the evaluator has been added to the manuscript conclusion.
