

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	2014_BJAST_9887
Title of the Manuscript:	Coag-flocculation approach to removal of colloidal particles from brewery waste water using okra seed extract

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The manuscript improved substantially. I recommend the publication of the manuscript after the correction of some minor issues: - Line 5: I suggest the inclusion of the scientific name of the plant "...for an effective use of Okra (<i>Hibiscus esculentus</i> L.) - Line 5 and 34: Scientific names should be in italics. I found some controversies with the scientific name of Okra. I suggest the consultation of the scientific name (e.g., http://www.theplantlist.org/) - Line 32 and subsequent: you included references 19 and 20, immediately after the reference 8. Please, check the numerical order of the references. - Line 112: the references (WST, 2005; AWWA, 2005) should be in numerical format according to the manuscript guidelines.	The scientific names are included in line 5 and 34 and in italics. The Latin binomial names for okra are <i>Abelmoschus esculentus</i> and <i>Hibiscus esculentus</i>[16]. The comments on lin32 and 112 have been corrected.
