

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	2013_BJAST_6467
Title of the Manuscript:	Integrated Electromagnetic and Magnetic Survey for Hydrogeophysical Characterization of Ijapo Housing Estate, Akure.

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The content of the document is good. However, the document requires thorough restructuring. I strongly advise that the headings should be worked on. The document lacks flow. Once you put proper headings it will be easy to follow your work, but as of now you are mixing concepts. I have highlighted areas which require immediate rectifications. If you still believe that the headings are satisfactory, you should then remove the material and methods section, so that you will get the liberty to discuss your results under each method; as of now the document need to be revised.	Thank you for your comments and suggestions on this work. Major restructuring work has been carried out on the manuscript in accordance with the suggestions you made. Efforts have been made to stick to your advice and comments.
