

Author's Feedback against Editorial Comment:

1) Title reformulation. Especially the part Do You Know Your Sh*t?

-Although it is informal and at first glance it seems a little bit aggressive, the title was very carefully selected for multiple purposes including to arouse the reader's curiosity and motivation to go beyond just reading the article. I really appreciate to keep the title please.

2) Do not use the short name of bacterium as *C. diff*. The use of the correct name is recommended.

-I have used the full name throughout the paper (highlighted in yellow).

3) Reformulation nonmicrobiology group and microbiology group, use group 1 and group 2 or other codification.

-I have changed the name as group 1 and group 2 throughout the paper (highlighted in yellow).

4) It is not very clear what the practical relevance of this study is?

-The inclusion of current and relevant topics to increase the motivation, interest and knowledge in microbiology education. I have added more explanations in discussion (highlighted in yellow). Thanks for your comment.

5) Insert a subsection to describe the method use for data analysis and interpretation.

- A subsection has been added (highlighted in yellow). Thanks for your comment.

6) Spelling again all the text.

-We have spelled checked the manuscript.
