Subject: Re: Request for final decision for manuscript number 2013_BJAST_4813

Actually, there are still some un-clear languages in the paper that make the manuscript **unprofessional**. For example, in the fourth line of the first paragraph, it reads 'They absorb light about 380 nm', authors should indicate the meaning of '380nm' clearly, e.g. the light with the wave length of 380nm??. In the second line of the second paragraph of the paper, it reads 'absorb sunlight wavelengths that reaches the 54 earth (>290 nm)', the 'sunlight wavelengths' cannot be absorbed, and this kind of mistake should not be found in a scientific research paper. Should it be 'absorb sunlight with the wavelengths of ... when ...'? Authors are suggested to go through the whole paper very carefully to avoid any unprofessional expressions to further improve the quality of the manuscript.

In addition, figures in the paper are not quite clear to read, especially figures 2 and 3.
