SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Abstract was not structured. Therefore was not in line with Journal format. The manuscript was not in accordance to the journal format. A lot of work is needed here. Is this work visible? Especially with the use of irradiation method on underutilized legume. I believe this method is costly and cannot be easily accessible by the farmers involved or industries in Nigeria. From Iwo, Osun State to energy centre, Abuja (very far). This legume when properly dried can keep for longer period of time (more than 6 months). The hard coat also aids the keeping quality. This is just the reviewer's view about the work. Anyway, the work provides information on the quality of the legume using irradiation method	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	This is an interesting work. Authors should download the instructions to author and template for this article. See more comments on the manuscript
