SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	No compulsory revision comments.	
<u>Minor</u> REVISION comments	No minor revision comments, except that the author (s) should ensure that the additional numberings, in brackets, for the end-of-manuscript reference lists are expunged.	
<u>Optional/General</u> comments	This is a well written, remarkably comprehensible and highly expository academic work with a wealth of remarkably relevant literature citations, a flavour of relevant Figures and Tables and a two-pronged appendix that provides a mathematical basis for the critical arguments adduced in support of the entire discourse. Aside from this, the organisation of the article is clear and concise under the relevant headings, which are, in turn, sequentially arranged in keeping with the rhythmic flow of the discourse. This clear organisation has enabled a vivid projection of the primary focus of the article, which includes an argument pertaining to the relationship between educational status and personal accomplishments on one hand and rationality and knowledge on the other hand. This manuscript is very valuable for publication.
