SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	This part should not be written in more detail and condensed. The objective of the study and the justification for the originality of the study should be explained more clearly. Material and method part is too long and more complex. Please rewrite. Results section is unclear and more sophisticated. Results' repetitions should be avoided in the discussion. The results of the study should be explicated in light of the available information and taking into consideration the causal link. On the other word, discussion has been written too poor. The conclusion should include also explanations aspect of the contributions of the results to mentioned scientific area. In addition, mentioned manuscript should be reviewed in term of English grammatical rules. Reference number should be fortified according to related explanations in discussion part.	
<u>Minor</u> REVISION comments
