

SDI Review Form 1.6

Journal Name:	<u>British Journal of Applied Science & Technology</u>
Manuscript Number:	2014_BJAST_11514
Title of the Manuscript:	Frequency/wavelength of Hawking radiations as characteristics of non-spinning black holes
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, corrects the manuscript and highlights that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Compulsory REVISION comments	As it stands I do not feel that this work is of great value and has no consequence for physics or cosmology and many important references are missing. However I do feel that the work has the potential for great importance if it could establish a relation between the frequency of wave length Hawking radiation and the observed dark energy density of the cosmos. This would entail major revision.	
Minor REVISION comments		
Optional/General comments
