

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	2014_BJAST_12282
Title of the Manuscript:	Evaluation of Groundwater Quality for Drinking water by using physico-chemical analysis at Ibb city, Yemen

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. Still, there are many English problems associated with the revised version. 2. The first conclusion, "These results were higher than the results 5005.5mg/l obtained by Al-sabahi et al. (2008)." Please check this sentence. Is it right? 3. There are many sentences repeating similar meanings. For example, "Groundwater is a vital source of water for drinking and irrigation all over the world" and "Groundwater is generally a very good source of drinking water, because of the purification properties of the soils; it is also used for irrigation and spraying, and for industrial purposes" in the first paragraph of Introduction. Another example, "Ibb city relies on groundwater for its supply" and "The most favorable source of the water supply system in Ibb city is groundwater."
