Note for authors:

* Even though this software is a 'simple word matching tool', some authors still require such service from a publisher to refine their manuscripts and to avoid some future copyright related complications.

* We are just neutrally using this software and sending the report to authors.

Sending this report to authors means:

- a) We are just communicating the end result of 'word matching software'. No separate message.
- b) We are not complaining about plagiarism.
- c) This report is intended only for some authors to correct some errors, which may occur during manuscript preparation.
- d) If any author finds that this report is 'not OK' and giving some 'false positive', we'll be happy to receive the 'defense feedback of authors'. In that case authors should give a 'simple declaration' with 'some reasons' to establish originality of their work.
- e) All these documents are stored digitally to maintain clear and complete history of every published (or rejected) paper to avoid future complications.

f) This report is sent to authors in the good faith that it will be helpful to establish integrity of scholarly publication. This report is not intended to insult any author. Kindly consider this 'essential step' (i.e. "generation of the report and collection of authors' feedback') as a 'neutral step' only to complete publication formalities.

After your clear clarification, other peer review/editorial formalities will be resumed. We hope that authors will appreciate our unique efforts to maintain 'integrity in scholarly publication'. One line of acknowledgement and fast reply will be highly appreciated.
