PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The paper in general is well written. However, it is too lengthy by containing much unwanted information for current study. The authors should revise the paper as follows: 1. Limit the number of figures 1-6 to the necessary figures, about 3 only. 2. Write a useful methodology and focus on the needed information. 3. The results of some samples are missing. Every result should include four samples (T1, T2, T6 and T7). 4. Discuss the results in accordance with the figures that must come from the measurements.	corrected the methodology has been revised the explanation has given in the methodology section corrected
<u>Minor</u> REVISION comments
