

SDI Review Form 1.6

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	2015_BJAST_17502
Title of the Manuscript:	The Role of Litter in Rainwater Interception
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	1. What is the standard deviation of figure 2? 2. What is the standard deviation of figure 4? 3. According to the thickness in Table 2, which one is the most sensitive factor to the results of Rainwater interception in Table 3 and 4, respectively?	1. value of standard deviation showed in regression curve (figures 2 – 4) 2. litter thickness > 5 cm which found in disturbed forest (HT) is the most sensitive factor to the result of rainwater interception (Table 3 and 4)
<u>Optional/General</u> comments
