SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	- There is redundancy in the result part where the information available in each table is mentioned/repeated several times in the body (text). - Constraints would be better if they are list according to their importance and put in graph. This will save space and become easier to understand	The information in the table is discussed, and probably mentioned repeatedly based on its importance Constraints are now listed in order of importance. This will make it easier to understand. To put a graph may not make any difference
<u>Minor</u> REVISION comments	- There are some topographical and grammatical errors in the in text that needs cross checking. - Some terminologies need to be defined first time they appeared.	Agree Terminologies to a general meaning should not be defined except for the purpose of the study, they have special meaning
<u>Optional/General</u> comments	Revise the list of references and citation and vice versa	List of reference and citation are correct in the present form following Journal recommendations.
