

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	2014_BJAST_15787
Title of the Manuscript:	COMPARATIVE STUDY OF THE PHYSICOCHEMICAL PROPERTIES OF OILS OF SHEANUT (Vitellaria paradoxa) AND COCOA (Theobroma cacao)
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Discussion is still tilted towards cocoa butter in terms of citing standards specified by Standard Organization of Nigeria to compare with the quality parameters of the cocoa butter in this research work. To balance the discussion and ascertain the quality of the shea butter extracted in this work, it will be worth comparing the values of the quality parameters of shea butter with specifications or standards by other regulatory bodies in Nigeria if Standard Organization of Nigeria don't have the information or compare with international standards on shea butter. Author(s) will strengthen the paper if this information is provided or indicated in the discussion The page numbers for references [2] and [15] have not been stated as well as the dates for visiting the websites of references [9] and [4].	This study compares sheanut with cocoa, hence the reason for using standards specified by Standard Organization of Nigeria for cocoa butter. The page numbers have been added to the reference. The authors cannot recollect the dates those websites were visited.
