PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The manuscript has been improved in this second revised version in comparison to the original manuscript. The authors managed to reanalysed the data using a "statistically" accepted number of samples (n=3). I believe this type of research will permit to develop healthier options for traditional Malaysian food products (i.e. nasi lemak). I do have several minor editorial text changes that I would like the authors to make: In abstract: (methodology): 'nasi lemak' not 'nasi lemak' (results): P in italics. Line 60: remove symbol ')' after 20cm Line 113: remove italics from '>0.05' Line 316: 'P' not 'p' Tables 3 to 7: in all tables bottom, change 'replications' to 'replicates' Figure 4: x-axis: 'days' not 'hours'. This change is mandatory.	Thank you for appreciating our work. The correction has been made. See abstract The correction has been made. See abstract The correction has been made.
