SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	Nil	
<u>Minor</u> REVISION comments	At some places the English is a bit weak and needs slight revisions.	A thorough review of the whole paper was carried out to improve the level of English.
<u>Optional/General</u> comments	The paper is very well written. It has touched upon a very important area which needs further attention. The fact that about 76 percent of rainwater harvesting systems have been damaged is a wake up call for the society. However, one weak area of the paper is that the suggestions for improvement of the existing system do not appear to be well researched.	Changes were made at the level of suggestions being given in the paper to make them appropriate.
