**PART 1: Review Comments**

|                                            | <b>Reviewer's comment</b>                                                                                                                                                                                                                                             | <b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b><u>Compulsory</u></b> REVISION comments |                                                                                                                                                                                                                                                                       |                                                                                                                                                                                      |
| <b><u>Minor</u></b> REVISION comments      | <p>Please provide a clinical recommendation to control high serum TSH levels months after treatment (synthetic T4?)</p> <p>Someone should edit the English in the manuscript. It was difficult to follow the text. This is the most important comment in my view.</p> |                                                                                                                                                                                      |
| <b><u>Optional/General</u></b> comments    | <p>The authors have used statistics to draw conclusions about their data.</p>                                                                                                                                                                                         |                                                                                                                                                                                      |
