SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. The manuscript is written in very poor English and the grammar is incorrect. Some sentences are very difficult to understand. The manuscript needs to be revised. 2. In the "Abstract" the author stated that there were 39 patients, but obviously the statistics were done on 21 patients. In my opinion the sample should include more patients for obtaining the valid conclusion. Anyway, the correct number of studied patients must be inserted and it is not 39 but 21. 3. The results including tables and figures should be inserted in part "Results". The author inserted Table 6 and Figure 3 in part "Discussion" which is completely wrong. It must be corrected. The Result section is the part of the manuscript where results of the study should be inserted whereas the Discussion is a section where all results are discussed and compared with the literature. 4. In my opinion there is a lack of relevant comparison between author's results and the literature. The author mentioned some facts but not really the relevant ones with his own results.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
