<u>Compulsory</u> REVISION comments	–	
<u>Minor</u> REVISION comments	The paper provides a remarkable research on adoption of e-learning in Nigerian Tertiary Institution of Learning. It seems good organized but needs some minor revisions before it can be published. The related revisions can be expressed briefly as follows: 1- Number of references seems enough but I think the author(s) should provide some more references from years: 2014, and 2015; in order to keep the paper up-to-date and improve its quality. 2- I think the figures should be provided in a more colourful form in order to improve attractiveness. Also some texts within the figures should be placed not over the shapes because it affects the readability a little negatively. 3- The paper provides a strong evaluation approach and discusses its conclusion accordingly. But it will be great if the author(s) can discuss about any possible future works at the end of the paper. Thanks the author(s) for their valuable efforts to form this paper.
