| <p>Dear author,<br/>The paper could be published in this journal, so I give a final positive decision.</p> <p>Comments</p> <p>If you want to keep the title, I have no further problems. But, your comment with respect to the other reviewers does not meet academic criteria. If one of the reviewers has a suggestion or a comment, it should be taken into consideration as such. Not all the reviewers have the same comments and remarks, therefore pay attention to this aspect for the future.</p> <p>My second remark refers to SEM images. I saw the magnification in the legend, but I have suggested something else. If the Editor accepts it like this, it is fine for me.</p> |                                                 |
