

SDI Review Form 1.6

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	2015_BJAST_17576
Title of the Manuscript:	Effects of tilt angle on flat-plate solar thermal collector systems
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. Line 125 – its mentioned that figure 3 shows the optimum tilt angle. Whereas in figure 3 graph is plotted between radiation and month which is of no relation as mentioned in line 125. 2. Need elaborate explanation in every case such as annual, semi annual, monthly etc. For rise and fall in solar radiation. Please clarify the ethical issues	
<u>Minor</u> REVISION comments	1. Line 87 – symbol is missing	
<u>Optional/General</u> comments	1. The calculation is said to be carried out using MAT lab, where as the graph plotted doesn't resemble a MAT lab graph.
