	No. 339-350 Redo the discussion of Table 4. For example, on line 341 “Table 4 show” should read “Table 4 shows.” Also, Y_{TIF} is your dependent variable. You are discussing K_{TIF} as though it is an independent variable. But it is not among the independent or explanatory variables across the top of your Table 4. Please redo that whole discussion. Y_{TIF} is an explanatory variable in Equation 1. According to your Table 4, all the explanatory variables you have across the top, such as Y_{MFG}, are not in equation 1. You have K_{TIF} in equation 1 as an explanatory variable but it is not listed as that in table 4. On Table 4, TIF is listed as explanatory variable but it is not such in any of your equations 1 through 32. No. 380-381. It is not clear how you make the connection between equations 10 and 17 Please revisit all the discussion areas to make sure you have your variables and coefficients in their correct places. I have chosen to indicate as much as possible the areas that the paper needs some corrections before publication. If the corrections are not made and any disagreement with suggested corrections not clarified, publication should be withheld.	No 339-350: Corrected. Presentation restructured No 380-381: Corrected. Presentation restructured
