(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

- This form has total 9 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	This is overall a well written paper. Line 2. Question may arise, however, about the comprehensiveness of the title because it did not capture one of the most important variables – the author could extend it to include. Economic growth. The title can be reviewed as <i>Empirical Analysis of the Relationship between FDI, Technology Transfer and Economic Growth in Nigeria</i> Lines 5,20,24,27,29,38,40, 41,45, 58,69,74,80,85,56,98,99,. I recommend that the author should correct the identified and other typing/editing errors The Introduction provided a clear statement of the point of research background on FDI, Technology Transfer, Human Capital, Openness and Economic Growth System. It has not clearly pointed out what kinds of relationship exist between. It should be modified to coherently show that. Literature Review should provide a framework on which the study was build upon. This should also be linked to Hypotheses (which are absent). This will not only add interesting dimension to work but would also clearly provided bases for the policy implication of the research	Done line 245-255 line 245-255

	findings. Correlation Results – Some of the coefficients are unusually high (0.901795) as shown in table 3. This may be due to normality or collinearity problems as such the author needs to check the assumptions required for parametric analysis. References – Quite a number of them have not conformed to the well known styles of referencing in use. It will do well for the author to correct that. For example I have googled searched and got Dutse, A. Y. (2008) Nigeria’s Economic Growth: Emphasizing the Role of Foreign Direct Investment in Transfer of Technology, <i>Communication of International Business Information Management Conference IBIMA vol.:3 no 11.</i> Available at http://www.ibimapublishing.com/journals/CIBIMA/volume3/v3n11.pdf as against what the author provides.
