- This form has total 7 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The title does not convey an academic paper or serious analysis. There is very little analytical rigour and almost no assessment of the merits of the proposed efforts vis a vis meaningful GHG reductions. The GHG emissions are only partial – and extremely partial, and have little consistency with national and international approaches, e.g. Scope 1, 2 and 3. Or even looking at various types of GHG emissions such as CO₂, CH₄, etc consistent with IPCC	We have changed the title and the focus of the paper significantly. We believe the application of our analysis to the broader goal of GHG emissions is much clearer than it previously was, as well as what we believe this paper contributes.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
