SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. The main concern regarding the paper is the lack of suitable references to proof the importance of the problem. The methodology should also be supported by relevant references. The author refers to Michael Porter's model, but Figure 1 has no reference. There is also a lack of references in the discussion of the results. There is no evidence of any journal articles in the references. 2. The methodology is not clearly described and the reasons why this specific model is used is not explained. No reference to validity or reliability of the data collection methods and results is made. The description of the method for data analysis is not addressed. 3. The abstract and paper should be language edited - first sentence of methodology (abstract) five forces was applies. Paper should not be written in the first person. 4. Consistent numbering is not followed. 5. In the abstract the author refers to a framework that was developed, but there is no evidence of such a framework in the paper.	Figure 1 and adopted Porter's forces represents the author's original approach. The Author has tried to remedy specified remarks.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	The topic of this study is relevant and describes the focus of the research. The importance of this topic is clearly indicated in the journal.
