- This form has total 7 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This paper has lots of grammar/wording/typographical issues. For example: 1. "Each of these players motivated by intrinsic values and common interests such as survival, profit and order." 2. "If an investor is rational should maximize the following function:" 3. "Where" right below an equation should be "where", 4. "ie." should be "i.e." A thorough proofreading of the manuscript is required. All the tables and graphs are not numbered. It is difficult to know what equations the authors are referring to in the text. The third equation in page 5 is wrong. The structure of the manuscript is not very clear to me. I couldn't find a clear linkage between two adjacent chapters. It might make sense to have one paragraph in the introduction part to talk about the flow of the paper. For the graph in page 10, instead of using colors to represent number of years of reserve, adding a column is better. When showing the calculation results, the authors should add the unit (e.g. \$).	Thanks this recommendation was made. Tables, Figures and Equations today has number. You have reason, was corrected. Today The section of Game Theory and Real Options are linkaged, in special in section 2.1, 2.1.1.
