PART 2: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	This paper is very weak in terms of methodology and execution. The level of statistical analysis is akin to a senior thesis at the undergraduate level.	We introduced two additional regressors to the three models(GDP growth rate and real effective exchange rate), and confirmed previous studies on incentives and export.
