SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	This is a very interesting empirical study. It would be significant from the policy makers' point of view, if conducted logically. The author(s) are requested to clearly state the contribution of this study to the existing literature and how this study is distinct from the existing similar studies. The empirical results obtained in the study are alright. This makes the study robust. The discussion part is almost non-existent in the study. The author(s) are requested to discuss the implications of the results so obtained thereby suggesting policy measures for better instances. The conclusion should be in reference with extant empirical literature on this issue.	Reply: Thank for the reviewer comment. I have modified in the revised version of the paper. I have used the yellow marker for the revised contents. Please check these. In the results and discussion section, I have included a new figure i.e. Fig. 4 (page # 11). This figure shows the efficient frontier. The section conclusion has been modified according to the current literature which has been marked by the yellow colour. Please check it (Page # 12).
