SDI Review Form 1.6

PART 1: Review Comments

	Reviewer’s comment	Author’s comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>														
Compulsory REVISION comments	Figure sources should just be- Adapted from Mossink and De Greef (2002). When you adapt you must have made suitable modifications. Then you include the whole reference in the reference list. Your recommendations should not be limited to the companies but also other stakeholders such as enforced legal framework by Government, Campaign and awareness etc I suggest the name of sampled companies should be replaced with number of sampled companies. In such studies, companies name should not be published for research ethical reasons. Use as illustrated below: <table><tr><td>S/N</td><td>Geo-zone</td><td>Number of companies</td><td></td><td></td><td></td><td></td></tr><tr><td>1</td><td>N-E</td><td>2</td><td></td><td></td><td></td><td></td></tr></table>	S/N	Geo-zone	Number of companies					1	N-E	2					Thanks for this observation, I have corrected it see the highlighted source of figure 2 in page 7. Thanks for this suggestion; I have included other stakeholders in the recommendations see page 19. Thanks for your suggestion, I have adjusted the table to accommodate your suggestion see table 1 in page 11.
S/N	Geo-zone	Number of companies														
1	N-E	2														
Minor REVISION comments	Also note: RESULTS AND DISCUSSION not DISCUSSIONS 1.1 Statement of the Problem Globally, the construction industry has a poor safety record. It remains one of the most dangerous industries in which to work.	Thanks, the adjustment has been made to read: RESULTS AND DISCUSSION see page 11.														

Comment [S01]: remove

SDI Review Form 1.6

<u>Optional/General</u> comments	Great job! Study was well conducted.	Thanks for the commendation.
