

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Economics, Management & Trade
Manuscript Number:	2013_BJEMT_4585
Title of the Manuscript:	THE LIKELIHOOD OF CORPORATE ENTREPRENEURSHIP IN LARGE CORPORATIONS

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
This new version of the paper is a considerable improvement over the earlier one. pending major revisions listed below. In brief, the author will want to carefully re-read their text to shorten or clarify many of their sentences. Heading 1 Introduction: Needs a better introduction into the issue. As it currently reads it is very confusing and does not lay out the issues well. For instance, the phrase “All the concepts on corporate culture, human capital, and social capital are valid in the field of corporate entrepreneurship while innovation is the fundamental element of entrepreneurship” could be better explained. Why? Who says it? Schumpeter? Heading 2 Research design: Maybe a timeline would help or a summary table, that way, authors could tighten up this section. Heading 4 Conclusions: The conclusions should be rewritten to reflect the centrality of key points or themes that will be addressed in the case study. What is the direction of further research? References section: Only 15 references were drawn upon your paper (relevant bibliography)? Also check the references because they aren't correctly written.	Thanks for the comments. The mentioned sentence was deleted. Furthermore, the fifth paragraph (from line 31 of page 2) of the Introduction Section has been revised to better clarify the characteristics of manager and moral consideration. The manuscript has been revised to the past tense throughout the Research Design Section. The first three paragraphs of the Conclusions Section have been revised to clarify the key points and the themes. The direction of further research was covered in the last paragraph. Additional references have been added and the overall Reference Section has been revised based on APA format and style.
